

## "B" SERIES

The "B" series compressor, thanks to hydraulic pumping elements, is suitable to work with a very wide range of suction pressure without pressure regulation valve. Therefore it is particularly indicated for trailer unloading at daughter stations (**booster**). Thanks to a compact design it is suitable to be installed on the trailer thus getting a **mobile station**.

### MAIN FEATURES:

Suction pressure: 20 ÷ 250 bar

Discharge pressure: 300 bar

Installed power: 15 ÷ 75 KW

N° cylinders / N° stages: 2 / 2

Absence of oil consumption

Negligible scheduled maintenance requirements

Air water cooling system

Driven by electric motor or gas engine for mobile station

High reliability

Absence vibrations

Very easy maintenance
