

CHILLER (ADDITIONAL GAS COOLING SYSTEM)

The chiller, usually installed on discharge lines before the dispensers, is used to increase the sales volume gas by cooling the gas even below ambient temperature.

It can be used with shell and tube heat exchanger or with tube in tube heat exchanger.

COMPLETE WITH:

- Refrigerator
- Cold water tank
- Recirculation pump
- Shutoff manual valves

MODEL	CAPACITY (fr/h)
CH 015	6.278
